

About RES

The world's largest independent renewable energy company

RES has been at the forefront of wind energy development for over 40 years and delivered more than 27GW of renewable energy projects worldwide. We employ more than 4,500 passionate people across the globe and are active in 24 countries, working across onshore and offshore wind, solar, energy storage, green hydrogen, transmission and distribution.

Sustainability lies at the core of our business activity and values, and we have been leading efforts to create a future where everyone has access to affordable zero carbon energy. The 27GW of green energy that we have developed and/or constructed offsets more than 21 million tonnes of carbon every year.

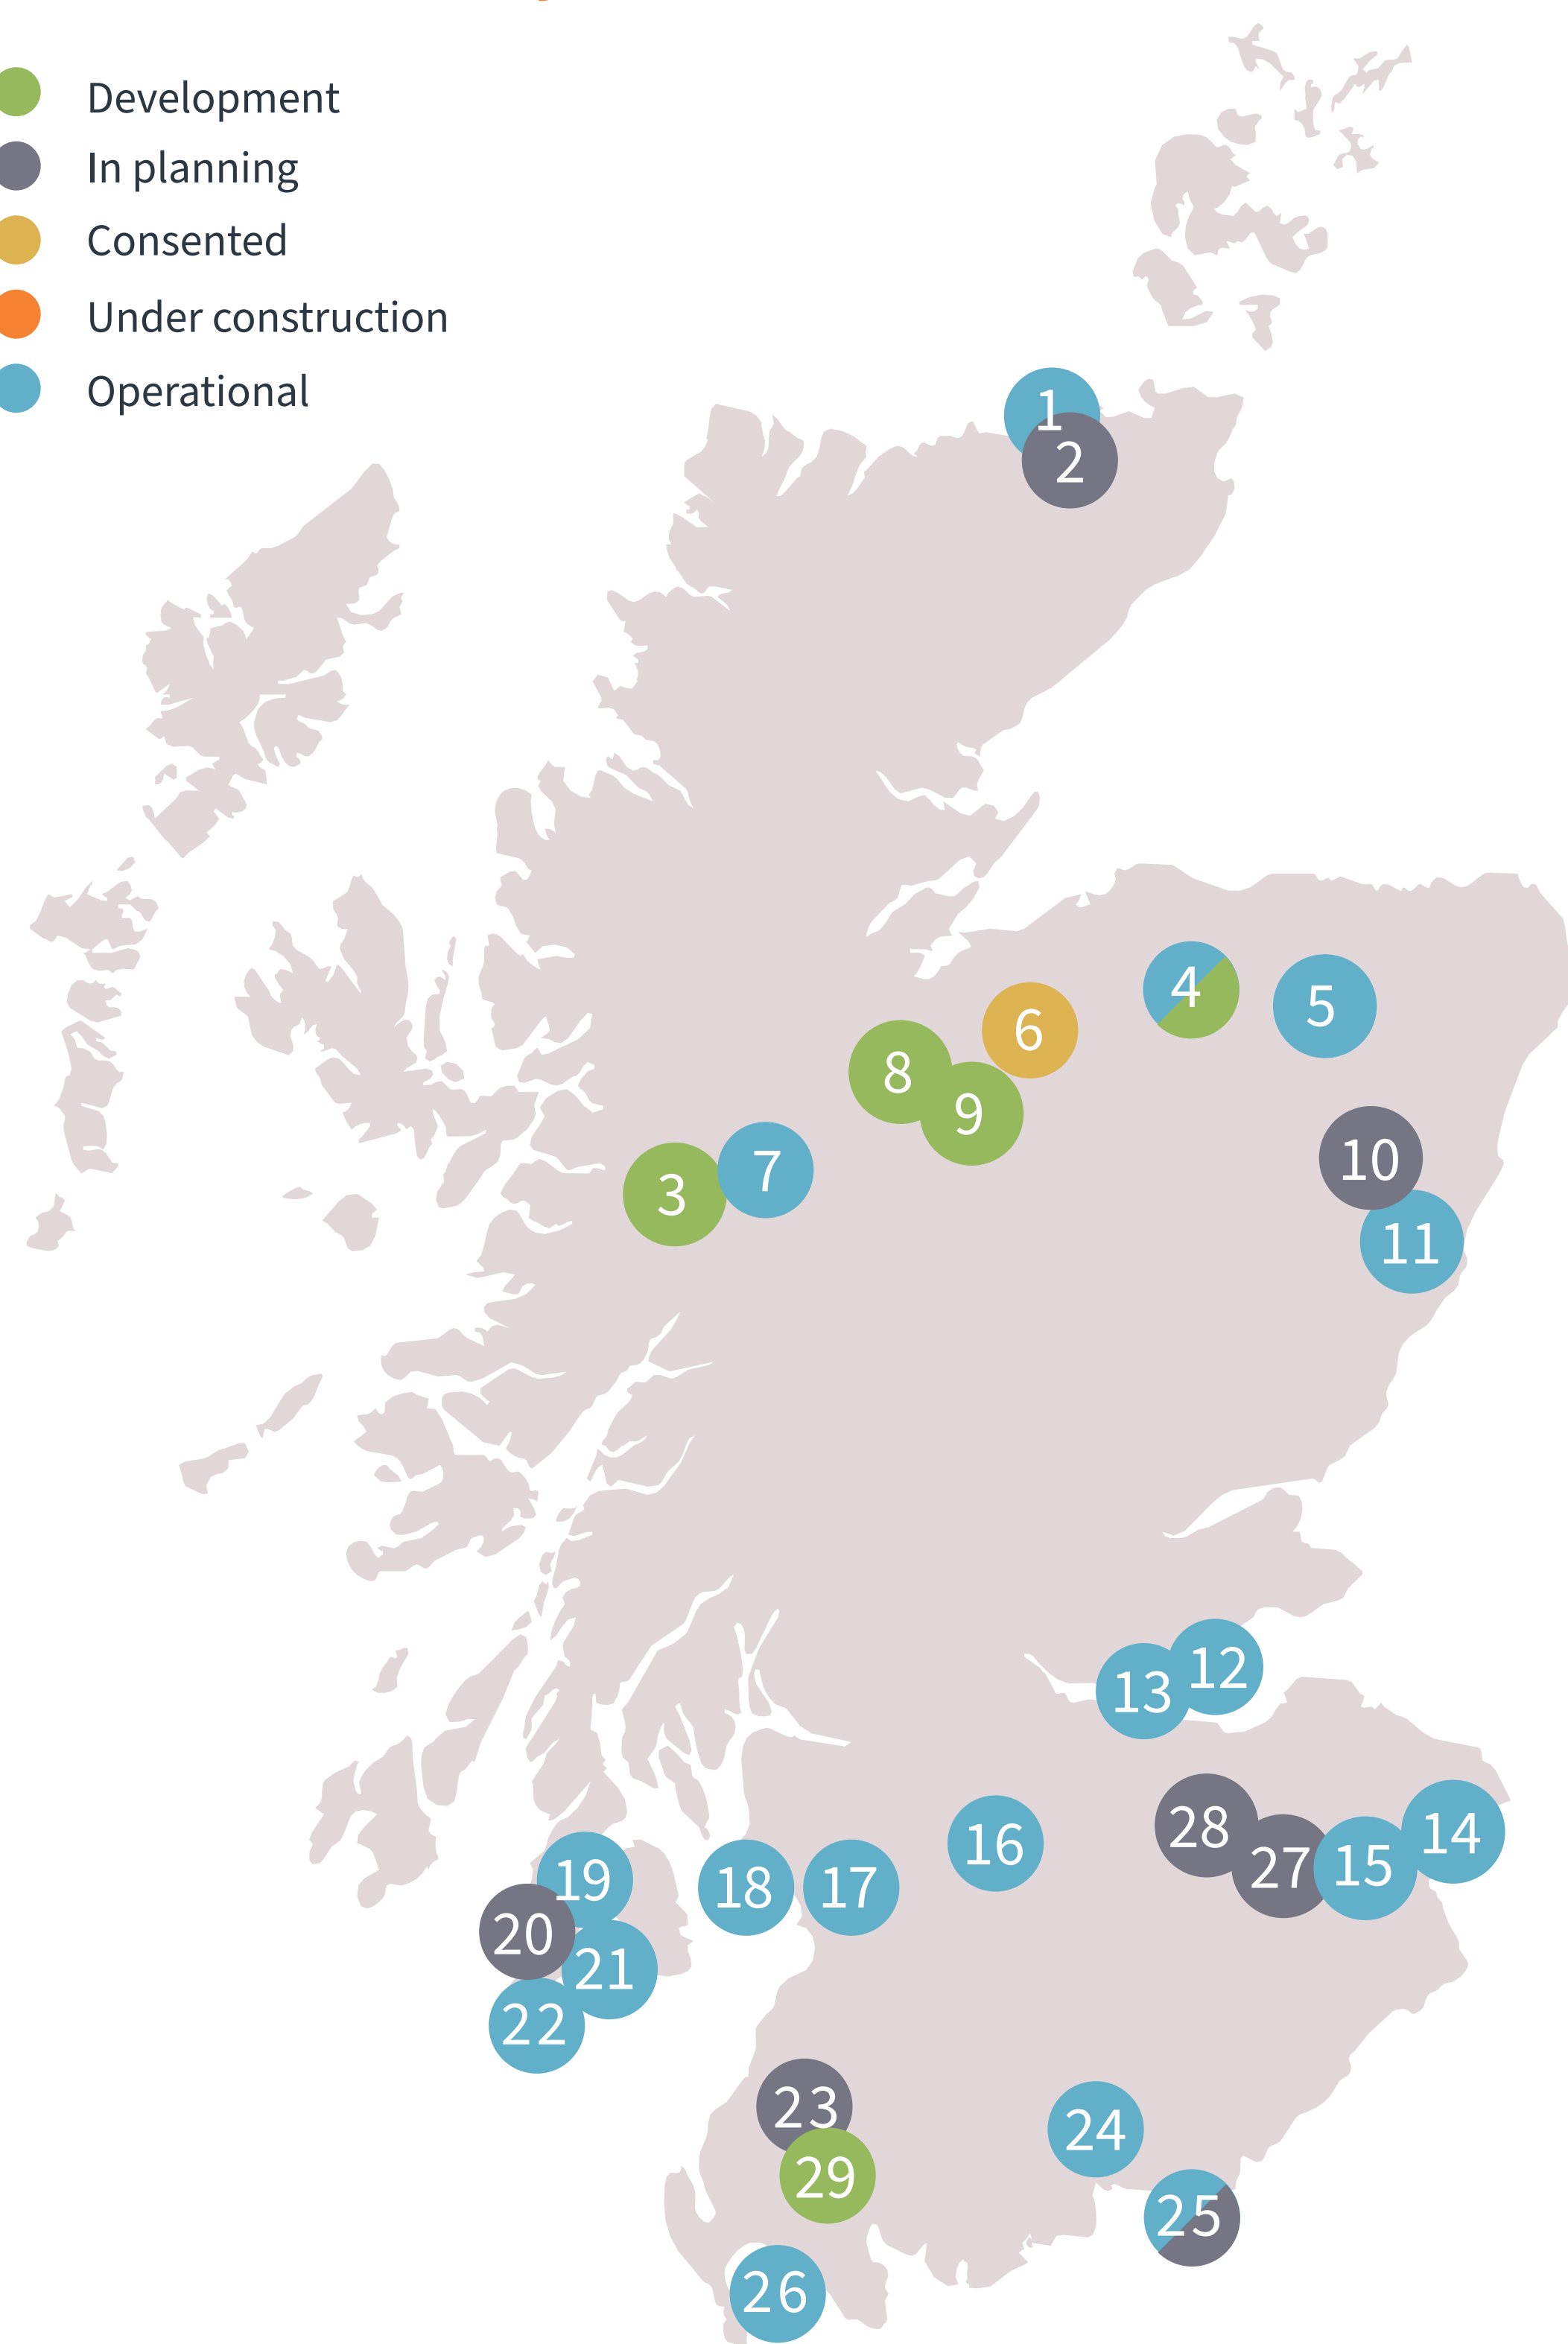

RES in Scotland

RES is a privately-owned company with a proud history in Scotland. We grew out of Sir Robert McAlpine, a British family-owned firm with over 140 years of experience in construction and engineering including the Glenfinnan Viaduct in the Highlands and the Emirates Arena and Sir Chris Hoy Velodrome in Glasgow. From our Glasgow office, we have been developing, constructing and operating wind farms across Scotland since 1993. This includes the development and/or construction of 22 wind farms in Scotland with a total generation capacity of 660MW.
