

The world's largest independent renewable energy company

RES has been at the forefront of wind energy development for over 40 years and delivered more than 24GW of renewable energy projects worldwide. We employ more than 4,500 passionate people across the globe and are active in 24 countries, working across onshore and offshore wind, solar, energy storage, green hydrogen, transmission and distribution.

Sustainability lies at the core of our business activity and values, and we have been leading efforts to create a future where everyone has access to affordable zero carbon energy. By listening, discussing, and working together, we can build clean energy project proposals that power positive change for everyone.

Onshore wind projects in Scotland

Map updated February 2024

RES in Scotland

RES is a privately-owned company with a proud history in Scotland. We grew out of Sir Robert McAlpine, a British family-owned firm with over 140 years of experience in construction and engineering including the Glenfinnan Viaduct in the Highlands and the Emirates Arena and Sir Chris Hoy Velodrome in Glasgow. From our Glasgow office, we have been developing, constructing and operating wind farms across Scotland since 1993. This includes the development and/or construction of 22 wind farms in Scotland with a total generation capacity of c.660MW.

Partnership with the University of the Highlands and Islands (UHI)

In February 2024, RES announced its partnership with the University of the Highlands and Islands (UHI) to support a minimum of 60 students through their Student Development Fund.

Created with the aim of helping UHI's students to further their personal development, the fund empowers them to gain new skills, raising their aspirations, whilst also helping to build their confidence. It does this by providing financial support to students to overcome barriers to participate in learning opportunities and extra-curricular activities. RES has pledged a total of £60,000 to UHI's Student Development Fund over the course of the next three years, providing the students of UHI with the best possible opportunity to maximise their talents and future careers.
